Our Story

Located in Bessemer, Alabama, Hager Equipment Company is a leading innovator in the underground mining equipment industry. It is what we do and it is all we do. Our sole focus is on the underground miner, and to provide the safest, most cost effective, and durable equipment possible. Hager Equipment Company has been increasing safety and productivity for customers for over forty years, and it shows in the evolution of our products. We offer a wide range of coal and potash mining equipment that includes shuttle cars, loading machines, mining locomotives and personnel carriers. We also provide a fast and reliable repair service for virtually every type of industrial drivetrain component in the market today, including transmissions, transfer cases, gearboxes, and axles. Our experienced team of engineers and sales/service persons has custom designed and built equipment to meet our customers' requirements in a way that has led Hager Equipment Company to the highest level of customer satisfaction and loyalty in the business. Give us an opportunity, and we WILL earn your business.
